A Blessing or a Curse?

DR. TALMAGE SPEAKS OF THE COMING WORLD'S FAIR.

His Text is from Ezekiel xxvii, 12: "They traded in thy fair." Pointed Questions of National Significance Asked by the Great Divine,

TUESDAY, Oct. 6.—The Rev. T. Do Wite Talmage, D. D., president of Princeton University, has written an article on the coming World's Fair, titled "Is the Coming World's Fair, Said It, a Blessing or a Curse?" His text was Ezekiel xxvii, 12: "They traded in thy fair."

Fairs may be for the sale of goods or for the exhibition of goods, or for pleasure, or for all manner of things. They bring us to the fairs of ancient Tyre, a city that is now extinct. But of the city was on an island, and parts of it remain. The conqueror, who was much embarrassed when he found so much of the city was on an island, had to have a bridge built across the water, and then to have his army to the beach, he ordered them to tear down the bridge, and then to march across it into the water, and build a causeway two hundred feet wide to the island. So they had to march across the water, and then to march across it, and with it built a causeway of timber and brick and stone, on which their horses and carriages could pass. That part of the city which lay on the island of the Euphrates river and over it, came to the capture of Nebuchadnezzar, who had taken the ruins which Alexander's army built is still there, and by almighty deposits has become a great island. And so it is with America.

Another suggestion concerning the coming exposition, set not the materialistic and carnal, but the spiritual and religious. During that exposition, the first time in all their lives, there will be thousands of people who have never been to a country without a state religion. Let us have an increased knowledge among all denominations of religion, and let us have the best of all the world's religions. The world needs that, and so mightily is now gradually giving rise of separation to what was left of Tyre. But, however, we have a new Tyre, a new Jerusalem, the greatest of all undertakings for laying cities, having covered up for the most part Babylon and Peleymus and Thessalon and Corinth and Cartago and Alexandria and Rome, and so forth. The world, which my text is taken, after enumerating the richest countries in the world, says of Tyre: "There is no king in Tyre; he is king of all the earth." All the world needs that. A man's religion is something between him and God, and must be kept secret, directly or indirectly, be interfered with.

Although on the first trial I have been

accused of being a heretic, and so it is no longer an island but a peninsula.

Perfectly harmless, continue we to pray, for the most part, for the most delicate persons with perfect safety.

At present we are in the grip of an appetitive, Headache, Nervous Depression and Paralysis, and so forth.

ROYAL BAKING POWDER

Dyspepsia

Makes the lives of many people miserable, and often leads to self-delusion. Disease, after saying, your stomach, said headache, heartburn, has a appetite, a faint, "all gone," feeling, bad taste in mouth.

Disease **After** **Eating** **It** requires care, persistent attention, and a remedy like Hood's Sarsaparilla, it tones the stomach, and other organs, regulates the digestion, creates a good appetite, and by this overcomes the tendency to dyspepsia. **Sick** tones removes the symptoms. **Headache** the effects of the disease, refreshes the head, and relieves the pain. **Aches** I have been troubled with dyspepsia. I had but little appetite, and what I did eat was hard to digest. **Heart** **Burn** after eating I would experience indigestion, tired, all-gone feeling, as though I had not eaten. **Weak** I was feeble, I think, was aggravated by my nerves, which is that of a pauper, and from being more or less up than down. **Sour** Spring I took Hood's Sarsaparilla, and it did me an immense amount of good. It gave me an appetite, and my food relished and satisfied the craving I had previously experienced." *Gloucester Page, Watertown, Mass.*

Indigestion

It not only a distressing complaint of itself, but, by causing the blood to become depraved and the system enfeebled, it is productive of innumerable evils. The Ayer's Sarsaparilla is the best cure for Indigestion, even when complicated with Liver Complaint, when accompanied with Jaundice, or from Mrs. Joseph Lake, of Brockway Centre, Mich.:—

"I have had indigestion and indigestion made my life a burden and gave me ending my existence. For more than a year I had been reduced almost to a skeleton, and hardly had strength to drag myself about. All the most delicate could be digested by me, he devoured nothing but meat. The physicians treated me without giving relief. Nothing that I took seemed to do me any good. I was compelled to give up the use of Ayer's Sarsaparilla, which after continuing to take the Sarsaparilla I could see no improvement in my condition. I had given up all hope and with it came the ability to digest the food taken, my strength greatly improved. After a few months of faithful attention to your woman, side to attend to all household duties. The medicine has given me a new lease of life."

Ayer's Sarsaparilla.

PROCTOR KNOTT.

Proctor Knott is the best known man in Kentucky. He is the florine's chair with the journalistic arrows of malice, envy and injustice lancing a crown of thorns above his whitening hairs. For doing his duty fearlessly and nobly the press of the State, re-enforced by dispepted and unscrupulous politicians, have sought and destroyed his political influence. He has made no sign. With an iron-bound and hostile Legislature blocking the way, with a treasury empty and a revenue system criminally defective; with the quiet conviction, assisted by demagogues, a menace to labor and the playing of characterless law makers, he bore his load with a stoic calmness. His eyes closed one of the chief administrators Kentucky has ever had, without turning a step from the narrow path of duty, or bending for a moment the clasm of a brutal mob as ever stormed Tuilleries.

Seemingly cold in his demeanor, a prey to rocking jolts, his heart is as warm as his mind is bright, and those who love him best are nearly as fond of him as of his heart. But he made no sign. With iron-bound and hostile Legislature blocking the way, with a treasury empty and a revenue system criminally defective; with the quiet conviction, assisted by demagogues, a menace to labor and the playing of characterless law makers, he bore his load with a stoic calmness. His eyes closed one of the chief administrators Kentucky has ever had, without turning a step from the narrow path of duty, or bending for a moment the clasm of a brutal mob as ever stormed Tuilleries.

Cancer on the Nose.

"My father had cancer and my husband died of cancer. In 1875 a lump appeared on my nose, and from its appearance and rapid growth, I became alarmed with the idea that I too, had cancer. I consulted my physician, but he gave me no advice to put me at rest, which did not relieve me, then he burnt it out, but the place would not heal. It gradually grew longer and worse, and I had fully made up my mind that I must also die of cancer. Friends prevailed on me to try Swift's Specific (S. S.) This I finally consented to do. After taking a few bottles I was entirely cured. Dr. King's Swift's Specific (S. S.) cured me when doctor and all other medicines failed."

True Virtue Crater.

For fifteen years I was afflicted with rheumatism, four years of which I was compelled to go on crutches. Words are inadequate to express the suffering I endured during that time. During these fifteen years of existence (it was not living), I tried every known remedy without receiving any benefit. I finally resorted to Swift's Specific (S. S.), which from the first application to my body I began to enjoy the best of health and a full man. I confidently believe that S. S. is the best blood purifier on the market today.

EDISON STUMBLED ON IT.
How the Wizard of Music Park Happened
to Invent the Phonograph.

I have never seen in print a true account of Thomas A. Edison, the wizard of music park, who was at one time in the "Wizard's" employ. The phonograph is the wonder of the world, and one of the few inventions which all previous rivals have now admitted. Edison's invention is the greatest of all his other inventions, and even his greatest rivals for fame, all of whom appear to harbor the idea that it is their duty to deprive him of his invention, have not yet done so.

Many years ago, while Edison was still in Mano Park and working night and day for him, he devised a model phonograph, and offered it to any other investor to make it practical by introducing the carbon plate into the transmitter. Edison's idea was to have a telephone for the telephone, Edison had constructed a number of small speaking drums, and test paper, and a pen which he compared with musical instruments.

He then had a number of small instruments which he had to project towards the magnet and assist in conveying the vibrations caused by the instrument.

The phonograph diagrammatical representation of this paper is shown in the figure.

Edison's idea was to use this paper to represent the high screen that conceals the entrance to the Mongolian town and figures appearing in the Chinese city.

The town in which you find yourself is more like the town in which you have just left England, and the people are dressed in English, and all that appears to the contrary you might suppose yourself to be in a Chinese city.
